

Fiber Optic Patch Panel Pro G1, 19", 1U/2U

Product Description

PAMix PRO G1 fiber optic patch panel enclosures are manufactured to suite internally splicing of fiber optic cables to fiber pigtails. Its sliding out design make it easy for fiber splicing and maintenance services. Pro G1 enclosures are designed to be installed on rack cabinet rails, enclosures are shipped with mounting brackets. It's usually used to connect active data switches in DC or data switches in multi dwelling buildings. Wide range of connectors can be used due to its flexible design. Pro G1 enclosures are the choice for professional installers where several front fiber patch cords entries in addition to hinged front cover for optimized cable management.
